If you plan to snowshoe in this area, please help preserve the quality of the machine-groomed ski trails and avoid conflict with skiers by following these suggestions:

- It’s usually more rewarding to pioneer your own route off the beaten track. Choosing a safe yet adventurous route also increases your chances of encountering wildlife.

- If you choose to follow a groomed ski trail, please don’t snowshoe in the set tracks or in the skate lane. Instead, keep to the outside edges, as pictured here.

Thanks for your cooperation in maintaining the quality of our groomed ski trails and promoting good will between forest recreationists!
